

[NUTRIMIN C - page 17](#)

- Everyone here is in for a real treat tonight because you are going to sample what Arbonne is best known for. That is our Anti-Aging Skin Care System, NutriMinC RE9.
- This line addresses repairing, preventing and reversing the visible signs of aging. It softens, conditions and protects the skin.
- Walk guests through **RE9 System on back of hand**
- Hint: appeal to the senses, have the guest touch, smell and see the difference!
- **Hydrating Wash** - (Do not use, just talk about) use morning and evening; removes all your make-up, including eye make-up. Will foam when used with water; clean fragrance. 1 pump is all you need. (This should last approx. 6 months.)
- **Balancing Toner** - Different than a lot of toners...it is a mist so no more cotton balls. We use no SD alcohol or acetone, which strip your skin. This toner visibly tones, firms and smooths the skins surface. (Lasts 3-4 months.)
- **Transforming Lift** - this has short term benefits of lifting, tightening and shrinking pores and the long-term benefits of all the anti-aging elements. Use this in the morning only. (Lasts 3-4 months.)
- **Facial Serum, Day & Night** - feels like silk. Use it morning & night. Gives your face a healthy glow by increases the cell turnover rate. As we age the rate at which the healthy, immature cells come to the top slows from 15 days (babies) to 45 days. (Lasts 3-4 months.)
- **Corrective Eye Crème** - Let them apply on one eye. Demonstrate how to apply with ring finger. Moisturizes the sensitive skin around the eye area. Kojic acid helps reduce the appearance of dark circles and puffiness. Can spot treat other areas of age spots! (Lasts 9-12 months.)
- **Moisturize** - One for day. One for night. They both contain peptides which enhance the skin's ability to visually improve smoothness and lessen the volume and depth of the wrinkles.
- **Day Crème** – Protects the skin and has a SPF 8. Doesn't feel heavy. (Lasts 6 months.)
- **Night Crème** – Repairs the damage that we have done to our skin during the day. Most important step!! (Lasts 6-9 months depending on skin type.)
  
- **Pass around the Before and After** of the RE9 system for the face.
- Ask the group to compare their hands! Have them note the difference in the appearance as well as the feel. This is after only 1 application of our incredible products!
- Hint: Because we use natural oils that penetrate the skin, their "Arbonnized" hand will still feel softer that the non-"Arbonnized" hand tomorrow.
